

Homeschool Topics to Brainstorm and Consider

- Thinking about your children's education, what are your goals for your children?
- What educational philosophy or style of learning fits your family's needs?
- When will you start homeschooling? Now? Next school year? Winter break?
- What schedule will you follow? How many days per week will you school? Will you school year-round or follow the 9-month calendar?
- Do you want to incorporate interest-based activities? Unit studies?
- Do you have a special needs child who will require you to move at a slower pace? Do you have a gifted child who wants to dive deeper into certain topics or move quickly?
- What type of curriculum do you want to use? Will you attend a homeschool convention in your area?
- Are there co-ops in your area? Will you join a co-op?
- Are you going to enroll in extracurricular classes?
- What is your budget for materials and activities?
- Where in your house will you complete school work?
